

Mudando a versão do PHP através de sua conta cPanel.

i Em nossos planos compartilhados que utilizam o painel **cPanel**, por padrão existe uma ferramenta chamada **PHP Selector**. Com ela é possível você alterar a versão do **PHP** para uma determinada conta **cPanel** de forma isolada, ou seja, a alteração não irá afetar as versões do **PHP** utilizadas em outras contas **cPanel**.

1 Acesse o seu painel cPanel e na página principal localize a opção "**Select PHP Version**" ou "Selecionar Versão PHP":

2 Dentro da ferramenta você irá visualizar a versão atual do **PHP** que está sendo utilizada para aquela conta **cPanel** e em "Versão do **PHP**" você irá localizar as versões do **PHP** disponíveis para aquela conta:

3 Ao selecionar a versão deseja do **PHP** será carregada uma lista de extensões, onde você deve selecionar as que serão utilizadas pela conta. Após definir as extensões clique em "Salvar" ao final da página e depois em "Set as current", para definir a versão do **PHP** selecionada.

PHP Selector | extensions

Current PHP version: **native (5.3)**

Versão do PHP: **5.4**
