

Bloqueio na Sorbs

Ao tentar realizar um envio de e-mail a mensagem foi retornada para a caixa de entrada com um erro semelhante ao abaixo?

```
This message was created automatically by mail delivery software.

A message that you sent could not be delivered to one or more of its
recipients. This is a permanent error. The following address(es) failed:
exemplo@exemplo.com.br
host server.exemplo.com.br [XX.XX.XX.XX]
SMTP error from remote mail server after RCPT TO:<exemplo@exemplo.com.br>:
550 5.7.0 Your server IP address is in the SORBS DNSBL database
```

Nesse caso, o IP de saída de e-mails do servidor está bloqueado na RBL da [Sorbs](#), onde o envio de e-mails apresentará falhas até que a reputação seja normalizada. Recomendamos que você visite o nosso artigo de ajuda [Como tratar SPAM](#) para maiores detalhes sobre como identificar possíveis abusos na fila de e-mails e em seguida realizar a solicitação de Delist.

Solicitando o Delist

Para a Sorbs, o processo de solicitação de delist é realizado através de uma página disponibilizada pelo próprio suporte, que pode ser acessada clicando [aqui](#).

Será necessário criar uma conta, para isso, basta acessar a opção [Registrar](#), onde será retornada uma página com as seguintes informações para preenchimento:

Name: * [?](#)
 Preferred Login ID: * [?](#)
 Password: * [?](#)
 Confirm Password: *
 Email Address: * [?](#)

The following fields are recommended, as it will help us to help you, entering junk here could result in delays processing support requests, you can always update this later. Entering a valid phone number will enable us to call you should you need one to one help with a problem. Your Country and Region is used by support staff to help with language issues. Your address is required if you wish to apply for additional access (such as the IP Management interfaces for ISPs and Companies.)

Home Phone: **
 Business Phone: **
 Mobile Phone: **
 Company: Not Applicable
 Address (line 1): Not Applicable *
 Address (line 2): Not Applicable
 Town/City: Not Applicable *
 State/County: *
 Zipcode/Postcode: *
 Country: *

The following two fields are important, as it will enable you to reset your password if you forget, staff cannot reset your password for you so set this with care.

Security Question: * [?](#)
 Security Answer: * [?](#)

The following two fields are not important, but will help Support Staff gauge their responses to you from a technical standpoint.

Autonomous Systems Number: 0 [?](#)
 Skill Level: None, I can play games though. *

Após preencher todos os campos, basta clicar em "Next" e a conta será criada.

2

Prosseguindo com a solicitação de delist, após acessar a conta criada, você deverá visualizar a seguinte página:

DELIST AN IP ADDRESS

An Error Occurred Processing Your Request

Sorry we have been unable to delist your address.

Additional information:

Not Authorised to delist this IP!

Additional Information: You must use the listed IP to be authorised, however if you work for the ISP have a Netmanager Account covering the networks for this IP address, the requirement is not applicable.

You may log a support ticket for this issue instead, however, if you have already done this it will count your case if you log a second ticket.

You are about to log a support Ticket with the following details:

Name: abuseteam
Email: delisting@hostdime.com
Listing Type: Spam (Spam Received from this host)
Using OS:
Problem host/IP: 162.221.186.34
DNS Record: ERROR resolving 34.186.221.162.in-addr.arpa.
DNS TTL (How long the record is value for): Negative Caching in Effect (Authoritative Result)

The ticket will be logged to the Spam DB Queue (Spam listing types are sent here)

Replies will be made to <delisting@hostdime.com> so if the address is incorrect you should go back to the start and reenter it correctly. Delisting will not happen unless a reply is received from the address submitted.

You should be patient as it can take a while to answer your ticket, if you log more than one ticket about the same address without good reason your request will go to the back of the queue, you may submit additional information by replying to the ticket notification mail.

Enter additional comments related to this issue to support your case for delisting (no HTML allowed):

Hello [Sorbs](#) team,

We already cleaned the account that was abusing on this server, now the queue is normal and everything is fine, may you guys proceed with delist?

Thanks in advance!

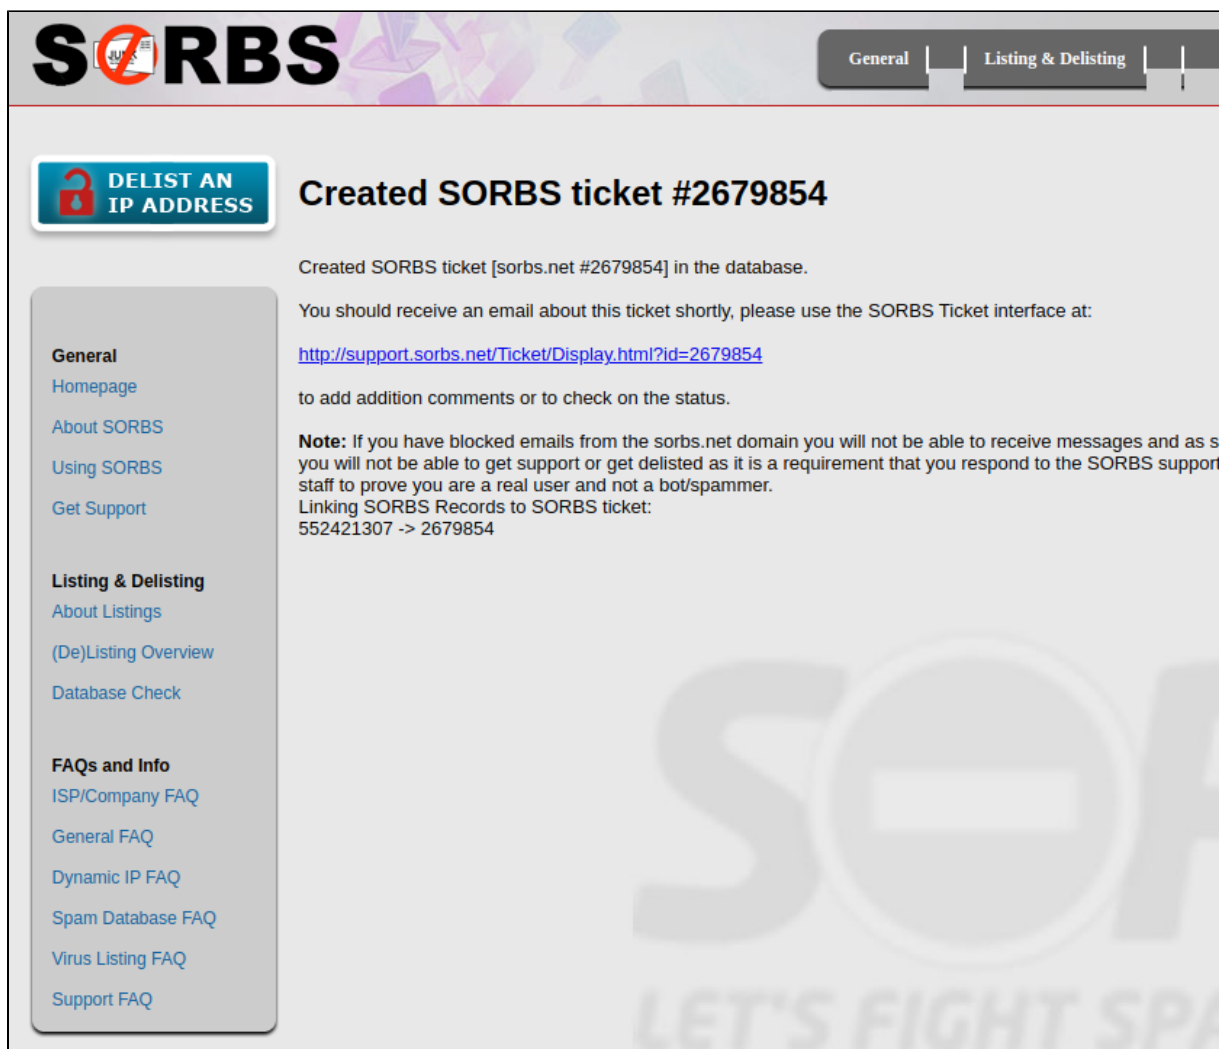

If you do not enter any additional comments your request may be rejected without review. Please use English if you wish to have a fast response as only a few of our support staff speak languages other than English.

If you do not speak English you could try one of the online translators, but please do re-convert the translated text back to your native language to see if it is readable. English speaking SORBS staff may attempt to use Google translate to reply to your native language, but we have found that it often renders the translated text unreadable or with very little sense.
