## Como redefinir a senha das contas cPanel no painel WHM.

0

5

Este artigo irá auxiliar a alteração de senha das contas cPanel dentro do painel WHM. Atualmente é possível redefinir a senha das contas cPanel de duas formas, vamos então à elas.

Utilize o campo "Change Password/Alterar senha" e insira a nova senha desejada, finalize a alteração clicando no botão "Change", como exemplo verifique imagem abaixo:

	Change	Log Log Out (root)										
list	::::::::::::::::::::::::::::::::::::::	E Home » Account Information » List Accounts 🚱										
Account Information		List accour	nts wher nio/conta	re domain que deseja a	or user mate	ches "hostd	lime.com.br".

Assim que realizar a alteração você será redirecionado para outra pagina confirmando a alteração com o seguinte conteúdo:

The password for hostdime has been changed. Password for "hostdime" has been changed.FTP password change has been queued. The following service passwords were changed: system , ftp , mail , MySQL.

A segunda forma de alterar a senha de uma conta cPanel é utilizando a ferramenta "Password Modification" em seu painel WHM. Acesse seu painel WHM e pesquise pela ferramenta "Password Modification"

6

Pesquise o domínio/conta que deseja alterar a senha.

Confirme marcando a "check box" do domínio.

Insira a senha e confirme-a.

Clique no botão "Change Password" para finalizar o procedimento de alteração.
